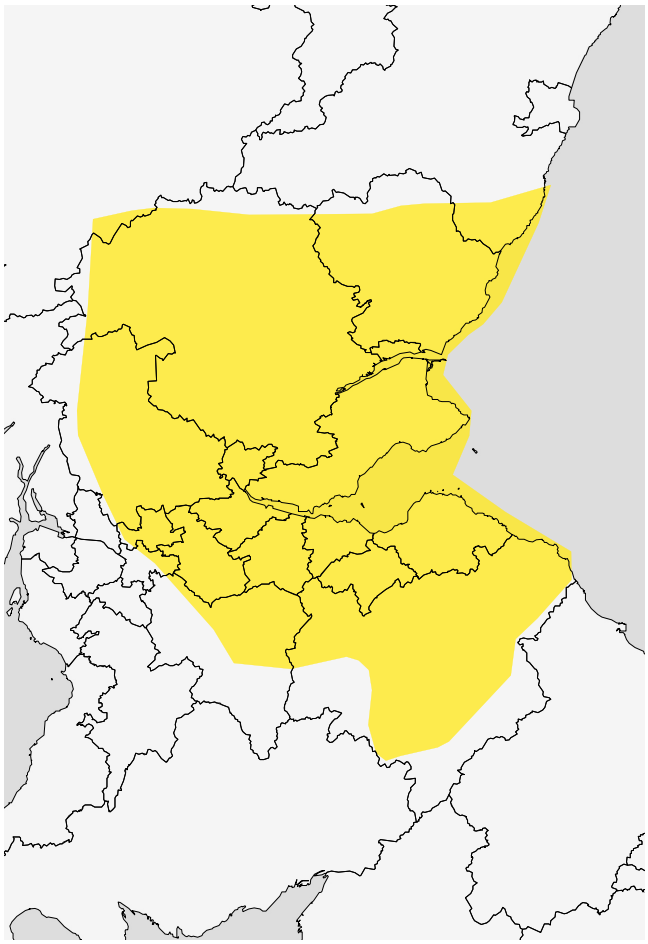
Yellow warning
Snow & Ice

Between
15:00 Sat 10 Dec 2022 and
12:00 Sun 11 Dec 2022



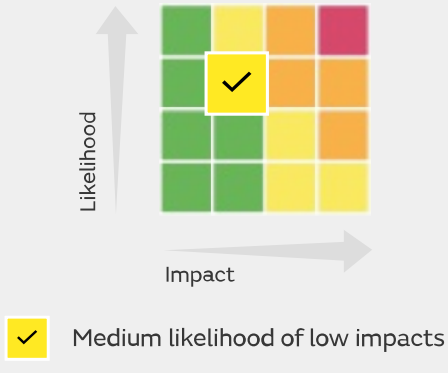
Snow and ice will make travelling difficult across central and southern Scotland during Sunday evening, overnight and into Monday morning.

What to expect

- Some roads and railways likely to be affected with longer journey times by road, bus and train services
- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths

Further details

An area of wintry showers will move into Angus and Tayside later Saturday and spread southwest overnight to affect more Central areas. This will then clear southwards and decay but showers will likely affect the southeast of Scotland through Sunday morning. Falling as rain or sleet near coasts but mostly as snow inland, with 1or 2 cm possible at low levels, but 5cm perhaps 10cm above 200m. Ice is also likely, especially where showers fall as rain or sleet.



✓ Medium likelihood of low impacts

Issued at 10:57 Fri 9 Dec, 2022
